## APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source and in conjunction with permit No. 4240, the same land being described in both filings. The amount of water herein granted is placed at the full statutory allowance of two and four tenths (2.4) cubic feet per second for the total area of land described, so that such amount of water may be diverted and used in the event there is no water whatever available in the source described in permit No. 4240. However, the total amount of water granted from both of the sources named in these two permits must not exceed the statutory allowance for the maximum area of land involved therein. The applicants will be required, at the time of filing proofs of beneficial use of water, to definitely segregate the areas of land which obtain water for irrigation purposes from each of the sources described in the permits, in order that certificates can be issued for the land to which the water of each source is appurtenant.

A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicants agree to the terms herein contained.

Application of water to beneficial use shall be made on or before February 14, 1923. Proof of the application of water to beneficial use must be filed with State Engineer on or before March 14, 1923.

*Proof of labor filed JUN - 7 1917* WITNESS MY HAND AND SEAL this 14th day  
*Map filed SEP 10 1917* of March, 1917.

*Proof of completion of work filed MAY 17 1919*

Cancelled Jan 2 1926 because of failure of  
applicant to comply with provisions of permit.
